FIG. 4

401 Server 103 receives a query (from Client 131) about MS 141's location

403 Server 103 verifies Client 131's eligibility for the query about MS 141

405 Server 103 obtains MS 141's serving cell from wireless network

407 Server 103 cannot fully understand the MS 141's serving cell information. Server 103 sends the MS 141's serving cell information to Centralized DB

409 Centralized DB checks its database 201 for MS 141's serving cell information

411 Centralized DB returns results to server 103
